- 071 Armored pillbox
- 073 Armored pillbox “NTP” mod. 1941 for machine-gun on foreground and reinforced concrete pillbox “Cover” on background.
- 076 Soviet 37mm “61-K” AA gun stands for fire
- 077-078 Soviet 45mm AT gun mod. 1942 stands for fire. GAZ-67 on the background
- 079-080 GAZ-67
- 082 Mercedes car. Found on battlefield in Kaluga area.
- 084 Opel passenger car. Found on battlefield in Smolensk region.
- 086-088 T-20 “Komsomolets” light artillery prime mover towing 45mm AT gun Mod. 1937. Found in swamp in Smolensk region.
- 090 BMW-321 passenger car.
- 092 GAZ-67 produced in 1952 towing 120mm(?) mortar.
- 094 Soviet 37mm “61-K” AA gun prepared for fire.
- 095 Fragment of bridge with a 2-axle car on it.
- 096 Remnants of German Bf-110 fighter
- 099 German 75mm mountain guns Mod. 1936.

- 100 Soviet 76mm ZIS-3 gun.
- 101, 103 Ambulance Mod. 1938. This is self-made modification mounted on GAZ-A chassis.
- 104 Lend-lease Ford GPA light amphibious car. This vehicle took part in crossing Oder river in 1945.
- 106-108 Soviet 76mm regimental gun mod. 1927 in transport position.
- 109-110 GAZ-MM vintage 1942. Was found on battlefield in Smolensk area.
- 112 Soviet field kitchen
- 113 Armored train (fragment)
- 114 Soviet 122mm howitzer Mod. 1909/37(?) in transport position.
- 115 Legendary Soviet GAZ-M1 passenger car
- 117 Soviet GTM grader mod. 1938. Was towed by TehTZ-60, -65 tractors
- 119,121 Soviet BA-64B armored car. Fragments of this vehicle were found in Arsenjev area (Far East)
- 122-123 Soviet 122mm howitzer Mod. 1910/30
- 124-125 Soviet 122mm howitzer M-30 Mod. 1938
- 128,130 Soviet 152mm howitzer D-1 Mod. 1943
- 131 Fragments of sanitary echelon.
- 132-133 “YeU” steam engine
- 134,136 TM-1-180 180mm railroad gun.
- 138 Soviet 25mm AA gun 72-K mod. 1940
- 140 Soviet 25mm paired AA gun 94-KM mod. 1944
- 141 American 90mm M1A1 AA gun
- 144 Soviet 85mm 52-K AA gun mod. 1939
- 146-147 Z-15-4B AA searchlight station mounted on ZIS-12 chassis
- 149 KS-12 85mm AA gun Mod. 1939
- 151 40mm “Bofors” Mk. I AA gun (Britain)
- 153 40mm “Bofors” M1 AA gun (USA)
- 155 37mm M3 AA gun (USA). This gun produced in 1942.
- 157 Soviet 37mm “61-K” AA gun
- 159 Soviet B-47 37mm paired AA gun mod. 1944
- 161-162 122mm A-19 gun Mod. 1931/37
- 163 152mm gun-howitzer ML-20 Mod. 1937
- 166 Breech ends of the 203mm B-4M howitzer and 152mm Br-2 gun. ML-20 gun-howitzer on foreground
- 168 203mm B-4M howitzer. Postwar modification. Original track gun-carriage replaced with wheeled one.
- 170-171 100mm BS-3 AT gun Mod. 1944
- 173-174 57mm ZIS-2 AT gun Mod. 1943
- 176-177 45mm AT gun “53-K” Mod. 1937
- 178,196 F-20 76mm semiuniversal experimental gun.
- 180-181 76mm ZIS-3 divisional gun Mod. 1942
- 183 76mm regimental gun Mod. 1943
- 185,186 76mm regimental gun Mod. 1927/42. Was produced in small series. Represented experimental sample.
- 188 76mm mountain gun Mod. 1938
- 190,193 35-K 76mm mountain gun Mod. 1936
- 192 76mm mountain gun Mod. 1909
- 195 76mm regimental gun Mod. 1927
- 198-199 45mm AT gun “M-42” Mod. 1942
- 201-202 Barrel carrier for 203mm B-4 howitzer
- 203-204 ISU-152 SP gun
- 205-206 Twin-turret T-26 tank Mod. 1931
- 207 BT-7 tank
- 208 T-70 tank
- 209-210 T-26 Mod. 1935
- 211,213 MkII “Matilda III” medium tank (Britain)
- 214 “Sherman” tank (USA)

- 215 The “Wasp” flame thrower SP gun Mod. 1944.
- 217 T-34-76 Mod. 1941/42
- 218-219 SU-57 SP gun
- 220 T-44 tank
- 221 T-34-85
- 222 Turret from KV-1s tank
- 223 BM-13-16 based on Studebaker US6(?) chassis
- 224 Soviet 107mm mountain mortar Mod. 1938
- 226 Soviet 120mm PM-120 mortar Mod. 1938
- 229 Soviet 160mm MT-13 divisional mortar Mod. 1943
- 231 IS-2 tank
- 232 IS-3 tank
- 233 SU-76i SP gun
- 234 IL-4 bomber
- 235 Bf-109 German fighter (“F” modification?)
- 236 305mm gun from Soviet battleship “Marat”-type
- 238,243 Torpedo-boat
- 240 5-tube 533mm torpedo-launcher
- 241,272-274 “Destroyer” installation. (rem. AMVAS. I had no chance to check what details were used for this installation. I think it can one of project “7”)
- 242 Armored cutter(?)
- 244,252 Deck-cabin of the Shch-307 submarine
- 245-248, 250-251, 276 TM-3-12 305mm railroad gun. This gun was used during defense of Khanko base. After its evacuation in December 1941 all guns were exploded. Finns managed to restore this gun using reserve barrel from the battleship “Emperor Alexander III”, which was rearmed by France in late 1920s.
